Smart ASOV SASO-200V

➤ Why does Smart ASOV automatically start filling when powered on?

The Smart ASOV performs a one-time filling automatically when it is first powered on. If it detects water when powered on, it will go into standby mode.

Smart ASOV SASO-200V

➤ Why doesn't Smart ASOV activate when the water level is below the sensor?

The Smart ASOV is designed for manual refilling.
It will not automatically refill when the sensor detects no water.

Smart ASOV SASO-200V

➤ Can the Smart ASOV be used with unfiltered water?

No.

Filtered water is required to prevent sediment from clogging the solenoid valve.

Do not install the solenoid valve before your filtration system or without a filtration system.
